

Peer Assessment - Milestone 3

Team Member	Matthew T Duong	Alan Lam	Hewa Annakkage Gaveen Senal Lakpura Amarapala	Hamed Alkaff	Youssef Haddara
Contribution (%)	25	21	27	27	0

List of Contributed items

Matthew:

- Trello clean up as per Sachin's request
 - Updated the tasks on Trello board and reorganized relevant tasks
- Contributed to video presentation
- Edited presentations together and created final video
- Worked on presentation regarding our sprint retrospective
 - Created the slides for retrospective presentation
 - Recorded the presentation
- Finalised documents:
 - Sprint backlog
 - Burndown chart for sprint
- Contributed to majority of project report
 - Did most of the writing and screenshots for the document

Alan:

- Refactoring backend booking functionality
 - Included search for booking by user - implementation not fully functional
- Refactored User model - include new variables
- Update release notes
- Update Acceptance tests document
- Update Product backlog/Sprint backlog
- Contributed to video presentation
- Made the diagram for project architecture used in project report
- Made the diagram for continuous integration used in project report
- Helped finalizing the summary of new features

Hamed:

- Added information and re-designed contact page
- Added information and re-designed About page
- Re-styled and designed the booking page
- Contributed to video presentation
- Updated product/Sprint backlog
- Contributed to the documentation of the milestone
- Fixed small bugs in the frontend
- Helped Gaveen redesign some of the cards in the home page.
- Helped gaveeen fix the datetimepicker bug
- Implemented semi-functional dashboard for worker (not included or committed)
- Implemented semi-functional list for past bookings and current bookings (not included or committed)
- Helped finalizing the summary of new features

Gaveen:

- Implemented Completed Login / Logout Feature using Redux
- Implemented Context aware Service Cards in front end by adding Redux Functionality to track which service card was most recently selected by User
- Implemented a Context Aware Front end Booking Page which is updated automatically based on the type of service chosen by the user in the Home page, which then directs the user to a customized booking page (based on the service selected), thus making the application Context Aware
- Fixed a major bug in date-time picker where the Date-time selected by the user during booking was ignored and a default date-time value was added for the booking, this issue has since been fixed and whatever date-time chosen by the user for booking is saved in GMT time.
- Helped Hamed improve the design of the Booking page.
- Initiated and completed pull request to merge new feature branch to master.
- Contributed to video presentation
- Compilation of "Summary of New Features Document"
- Updated Sprint backlog / Product Backlog
- Contributed to the documentation of the milestone

Youssef:

- Did not contribute
